DevOps & Cloud

Docker · Linux · AWS EC2 · PM2 · Nginx ·

GitHub Actions · CI/CD

Tools

Git · Microsoft Office

SUMMARY

Passionate Computer Science student and DevOps Intern with hands-on experience in building modern web applications and deploying them using cloud and DevOps technologies. Skilled in Next.js, React, TypeScript, Node.js, Docker, AWS EC2, Linux, PM2, Nginx, Git, and MySQL. Strong problem-solving abilities with a keen interest in scalable web architecture, automation, and cloud infrastructure

EXPERIENCE

DevOps Intern

DafiLabs

- During my internship at DafiLabs, I gained practical exposure to DevOps practices by assisting with Linux server management, application deployment, and cloud infrastructure
- I learned to work with Docker containers, AWS EC2 instances, PM2 process management, Nginx web server configuration, and SSL setup using Let's Encrypt
- I also collaborated with Git and GitHub for version control, explored deployment workflows, and strengthened my understanding of automation, server configuration, and modern software deployment practices under the guidance of experienced developers

PROJECTS

Smart Mood Tracker

An intelligent wellbeing platform that analyzes user emotions and provides personalized Quranic verses, Hadith recommendations, mood history, and weekly analytics

- Mood Detection
- Authentication
- Dashboard
- Mood History
- Weekly Reports
- Personalized Islamic Recommendations

Lumina – Event Management System

A complete event management system with separate Admin, Recruiter, and User portals

- Event Booking
- Role Management
- Admin Dashboard
- Public & Private Events
- Recruiter Portal
- User Portal
